

1 him, does what, wait for two weeks. And I asked about Mommy and she said
2 she smiles. I have smile here. She said she just wants to hurt his feelings, I
3 said, well, what makes you think she wants- I have a question mark here,
4 which means I asked a question about that, what do you mean or what makes
5 you think that. because my Daddy told me.
6

7 Q. Now, before you didn't say immediately before she just wants to hurt her
8 feelings, you didn't indicate that you asked her what Mommy said or some
9 words to that effect.
10

11 A. I have Daddy cries, Mommy and she goes, smiles. And this is about dropping
12 him off and parents feelings.
13

14 Q. From your understanding, Doctor, when did the problems start in terms of
15 pulling out her hair, pulling her eyebrows, pulling the hair off her arms. those
16 types of things?
17

18 A. I'm not sure of the exact time frame. When I met with the parents in March
19 and then Mom April 9th, pulling eyebrows and hair was in the list of behaviors
20 that she had given me that I immediately started making the calls to make a
21 referral for a psychiatric eval.
22
23
24
25

1 Q. That was in March?

2 A. That was the call to me April 9th. That's in the list of behaviors from Mom
3 April 9th.

4 Q. And it wasn't important to you when the behavior began?

5 A. The whole thing is important. At that point I has just gotten a list, the list is
6 what concerned me, barking, biting, pulling eyebrows, hair, cutting with
7 scissors, biting self, killing- making threats about hurting herself and when that
8 list was done, I said I needed to call and start a referral process to Doctor Hill
9 because of the safety. At that point, that's where I was at.

10 Q. All right. Once again, would the answer to my question then be no, you don't
11 care when that behavior began?

12 A. I did say, yes I do care, however, that's what that was. I know the hair pulling
13 is more recent than- hasn't been going on a long time, but I believe it's this
14 year. But to me it's a part of the whole set of behaviors that are significant.

15 Q. Would it be important, Doctor, to determine what caused this type of activity,
16 caused it to start?

17 A. The hair pulling?
