Hollidaysburg, Pa 16648

January 23, 2009

Dear Sir or Madam,

For reasons further explained I wish to file a two part criminal complaint (indexed as part 1 and part 2) with hopes that the FBI would take these complaints serious enough to open an investigation into these abuses against humanity either independently or conjointly.

According to the FBI's own website, "Public Corruption" is listed as the #4 priority of the FBI, and that the FBI's jurisdiction in these matters reaches as far as the "local" level. The following complaint details several issues and instances of Public Corruption perpetrated under color of law within the Common Pleas Court of Blair County, Pennsylvania, and its appendage Blair County Children and Youth Services and multiple practitioner's in the local mental health industry. Unfortunately after my eight years experience of trying to get people in authority to initiate an investigation of a corrupt county court system, I regrettably concede that in the United States of America there are certain privileged elected officials that are held above federal and state laws. Violation of sworn oaths to protect, defend, and uphold state and federal constitutions are disregarded with impunity. Perhaps President Bush knew something far deeper by his analogy that the constitution is nothing more than a god damned piece of paper. Undoubtedly its legal impact and significance has been reduced to nothing more than ceremonial window dressing. Still, I make these complaints with a renewed hope that President Obama's proposed change in the way America does business will be constitutionally fundamental and mean that the imbedded judicial corruption in Blair County will be rightfully investigated with the highest expectations that the perpetrators of these numerous criminal acts are brought to justice and prosecuted accordingly.

Part 1

A brief synopsis of the crimes complained of in my case docket # (96 GN 2139) is the judge extensively altered the trial/hearing transcripts, fabricated and tampered with physical evidence, tampered with public records, suborned the psychological, medical, and institutional abuse of a child, , kidnapping fraud, and criminal conspiracy to commit all the above. The crimes complained of in “part one” of my complaint are more fully set forth and evidenced in the enclosed documents/marked exhibit - A, B, C, D. When push came to shove the judge escaped total accountability and oversight for his unethical behaviors when he conspired with and manipulated my last attorney Anthony Zaroni to eradicate the appellate review of his final order in my case. (A detailed private criminal complaint against this attorney is enclosed and marked exhibit-E), with appendages of proof that the attorney conspired to deprive rights by fraud. If this office requires a federal law that was violated I offer -- 18 USC 241 CONSPIRACY AGAINST RIGHTS

If for some political reason “part one” of my complaint will not be investigated I am filing “part two” of my complaint in hopes that my daughter will be rescued from the hell on earth that Judge Hiram Carpenter condemned her to live in. I submit that “part 2” can be investigated and corrected without involving or implicating the corrupt court, corrupt judge, or its collaborators. In Mr. Carpenter’s own words he said the order that he was about to make in the matter of 96 GN 2139 is going to change the rest of my daughter’s (Stephanie Kearns) life. Below I wish to outline the horrendous life changes that Judge Hiram Carpenter made for my daughter. These changes are in effect inhumane criminal abuses against a helpless human being and they need to be investigated and stopped ___ yesterday.

Part Two

Judge Hiram Carpenter’s changes for my daughter’s life began on April 10, 2000. He started off reinforcing the above statement when he illegally and recklessly quashed a state mandated Children and Youth Services child abuse investigation against Stephanie’s mother and half sister for severely beating her up in a bathtub on Easter Sunday. Without an earnest CYS inquiry

Stephanie Kearns was left in the precarious predicament of having to live and survive with her abusers. To cover up for this long term physical and emotional abuse, Stephanie has been spuriously labeled and provided situational made-to-order and adaptive fabricated symptoms of psychological disorders which have subsequently facilitated her being dangerously psychotropically drugged for an additional nine years. All done and instigated by a mother, who herself, has blatantly displayed symptoms of Munchausen by Proxy. Stephanie has been unduly convinced during this time period that she is mentally ill. She has been subjected to constant brainwashing aka (Parental Alienation Syndrome) to make her believe that her father and paternal family abandoned her and wants no part of her life. Because of the judicial and psychological abuses, she was placed in a Individualized Education Program in the Altoona Area High School and was enrolled in an emotional support and an anger management program. Take a minute and try to imagine yourself being placed in an emotional support program while the very conditions that were causing those emotional problems were being side stepped, maintained, and exacerbated on a daily basis.

Five years after Judge Carpenter issued his order from hell, Stephanie was in eleventh grade and sought the help of her only high school friend (Stephanie Farber) to make contact with her paternal family that she was unable to see or talk to for five years. Subsequently with a little coaxing and some assurances that everything would be all right Stephanie reached out to her paternal family by a Sheetz store pay phone on November 22, 2004, and November 30, 2004 and contacted a paternal aunt. At that time Stephanie was biding her time until she turned eighteen years old and told her Aunt Diane that when she turns eighteen she will get a drivers license and will come to visit all of us, and maybe live with her dad. On December 8, 2004, Stephanie telephoned me (her dad) from an Altoona Public Library pay phone and asked me and her Uncle Dave to meet her in the Altoona Public Library. When Uncle Dave and I went to meet with Stephanie at the library we found Stephanie sitting at a computer desk with her back turned towards us. To our surprise her mother left work prematurely and was looking straight at the library entrance door after someone summoned her to the library. When Uncle Dave and I approached Stephanie she just sat there with her back to us trembling and too frightened to even acknowledge our presence. Her mother demanded that Stephanie pack up her things immediately

because they were leaving the building. That miniscule contact in 2004 was the last time I or any family member ever heard from or saw my daughter again. In summary, every instance that Stephanie arranged to meet with me or other family members were thwarted and interfered with by the mother.

The painful reality is that Stephanie is now 21 years old and is still being held a prisoner in a condition of Bedlam and false imprisonment in her own residence. Against her wishes she has been isolated from the entire paternal family for nine years. She has been deprived of any telephone contact or written communications with her father and family. The mother had installed call blocking and call gate services on her telephone system to shut Stephanie off from making or receiving any outside world contacts that are not pre-approved by her mother. While in high school Stephanie's classmates revealed that she was not allowed to travel beyond the immediate vicinity of her residence without her mother or a member of the maternal family escorting her. She is not allowed to have more than one friend in her life which is kept under close and constant monitoring by her mother. Stephanie has been forbidden to acquire a drivers license simply because she has told her mother that she will visit her father and family when she turns eighteen. All this endless cruelty, hurt, suffering, and destruction of human life because a malicious and vindictive judge (whose crimes have been enabled and shielded by the justice system) deprived Stephanie for no legitimate reason all contact with the paternal family that she loved and was raised with. I can't emphasize enough that this situation Stephanie was condemned to is the work of sick individuals.

Several people I have become good friends with from out of town, and as far as California made several efforts to make telephone contact with my daughter. On every attempt their telephone calls were intercepted by Stephanie's mother who would then refuse to leave anyone talk directly to Stephanie. This situation is has become so despicable the mother even threatened to sue the last person who tried to make contact with Stephanie.

On December 8, 2008, I hired a private investigator to acquire information relative to my daughter's employment record. It was my hopes to have my child support order terminated since

my daughter is now 21 years old and I have been forbidden to see her for nine years. It was also my hopes that locating a place of employment would have provided an intermediate neutral facility where I could have made contact with my daughter.

Instead, on January 1, 2009, the private investigator returned a report that my daughter is not working, has no work record, and concluded that after several surveillances' of the mother's residence, it appears that my daughter never leaves the house.

The corrupt Blair County judicial system severely broke Stephanie's childhood and now young adult life. For nearly nine years I anticipated that a fitting and proper investigation into these crimes would have released Stephanie from her hell on earth. Unless law enforcement authorities step in and put an end to this madness, the emotional and psychological abuse will continue unabated for Stephanie for the rest of her life, or until her mother is dead. No human being deserves this kind of mistreatment. I am asking the FBI to seek the release of Stephanie from her bondage and provide her substantial fairness and justice by bringing the perpetrators of these crimes to justice.

Before I am advised by your office that this a state matter, I contend that this issue has been repetitiously brought to the offices of the state attorney general, and the Blair County District Attorney's attention. Having made several efforts to get state law enforcement involved with this situation the attorney general steadfastly maintains that it is not his jurisdiction to investigate these crimes, and suggested this is a matter for the local district attorney to investigate. Following this advice I made a couple attempts at getting the district attorney to investigate these crimes. Not once did I get a response from the DA's office. The truth of the matter is, district attorney Richard Consiglio can't investigate the crimes and abuses in this case since he was the original custody master who started this abusive downhill chain of events. On October 4, 2007, I sent a letter to Attorney General Tom Corbett explaining why Mr. Consiglio is incapable of opening any investigation into this matter, whereby making this a matter for the AG's office to investigate. The letter is enclosed as exhibit F. I received no response. Also enclosed is a memorandum of law (written by an attorney) previously indexed exhibit - D describing how Mr.

Consiglio's adjudicating processes abused Stephanie and were inconsistent with the law.

Further, during my eight year crusade to have Judge Hiram Carpenter impeached by the Pennsylvania House of Representatives I found the cover up of this judge's crimes deepening when I was advised by Mr. David M. McLaughlin -- Attorney & Sr. Analyst to Rep. Thomas Caltagirone, Chairman of The House Judiciary Committee that the state is powerless to investigate public corruption or remove corrupt judges from office absent a federal investigation. See e-mail letter below.

Dear Mr. Kearns,

I have been asked to reply to your recent email to Rep. Caltagirone, and to inform you that there will be no meeting with him for the following reason. In consideration of the separation of powers, Rep. Caltagirone could not ethically, or politically do anything in this matter nor could he inject the prestige of his office into it in any fashion. This is a dispute between you and selected members of the bench in your home county. Absent federal investigatory involvement, the only course open to you is the one you are taking.

I regret we can be of no service to you in this instance. But, Rep. Caltagirone could not possibly become entwined in a personal dispute between you and sitting judges in your county, even one that rises, in your view, to the level of impeachable actions on the part of those judges.

Cordially and respectfully,

David M. McGlaughlin-Attorney & Sr. Analyst

To Rep. Thomas Caltagirone

I beg, anticipate, and would very much appreciate your office's cooperation, integrity, and

professionalism to provide even a small semblance of justice in this matter. If your office should require anything additional, please do not hesitate to contact me.

However, after your review of these complaints and you feel that your office is inadequately qualified or staffed to conduct such an investigation, I respectfully request a formal letter explaining the reason for your determination, to which I could at least file for a re-review of that decision at the U.S. Department of Justice, Office of Professional Responsibility.

Respectfully,

Robert G. Kearns, Jr.
Stephanie's dad
